

分数 (1) 分数のたし算・ひき算

次の計算をなさい。

$$\textcircled{1} \frac{6}{17} + \frac{9}{17} = \frac{15}{17}$$

$$\textcircled{7} 2\frac{5}{7} + 3\frac{6}{7} = 6\frac{4}{7}$$

$$\textcircled{2} 2\frac{6}{13} + \frac{5}{13} = 2\frac{11}{13}$$

$$\textcircled{8} 6 - 5\frac{2}{15} = \frac{13}{15}$$

$$\textcircled{3} 1\frac{9}{11} - \frac{3}{11} = 1\frac{6}{11}$$

$$\textcircled{9} 9\frac{2}{9} - 7\frac{7}{9} = 1\frac{4}{9}$$

$$\textcircled{4} 1 - \frac{19}{21} = \frac{2}{21}$$

$$\textcircled{10} 6\frac{6}{11} + 8\frac{8}{11} = 15\frac{3}{11}$$

$$\textcircled{5} \frac{7}{8} + \frac{6}{8} = 1\frac{5}{8}$$

$$\textcircled{11} 5\frac{15}{17} + 3\frac{13}{17} = 9\frac{11}{17}$$

$$\textcircled{6} 6 - 3\frac{3}{10} = 2\frac{7}{10}$$

$$\textcircled{12} 10 - 4\frac{5}{12} = 5\frac{7}{12}$$
