

分母がちがう分数（2）たし算・ひき算

次の計算をなさい。

$$\textcircled{1} \frac{1}{4} + \frac{3}{8} = \frac{5}{8}$$

$$\textcircled{7} \frac{3}{10} + \frac{1}{6} = \frac{7}{15}$$

$$\textcircled{2} \frac{1}{6} + \frac{2}{9} = \frac{7}{18}$$

$$\textcircled{8} \frac{5}{7} - \frac{2}{5} = \frac{11}{35}$$

$$\textcircled{3} \frac{1}{3} - \frac{2}{9} = \frac{1}{9}$$

$$\textcircled{9} \frac{7}{12} - \frac{4}{15} = \frac{19}{60}$$

$$\textcircled{4} \frac{3}{4} - \frac{7}{12} = \frac{1}{6}$$

$$\textcircled{10} \frac{5}{18} + \frac{7}{12} = \frac{31}{36}$$

$$\textcircled{5} \frac{1}{4} + \frac{2}{3} = \frac{11}{12}$$

$$\textcircled{11} \frac{5}{8} - \frac{5}{12} = \frac{5}{24}$$

$$\textcircled{6} \frac{5}{6} - \frac{5}{8} = \frac{5}{24}$$

$$\textcircled{12} \frac{3}{14} + \frac{8}{21} = \frac{25}{42}$$
